Top Gun Model Portfolio Methodology

Creating Asset Allocations (Pages 3 - 6) – By leveraging the asset allocator module within the Zephyr platform we create the optimized asset allocations for the four model portfolios (80/20, 60/40, 40/60, 20/80) using the Black-Litterman forecasting model. We use primary asset classes which are consistent with our PSN Top Gun universes including: U.S. large cap equities (Russell 1000), U.S. large cap growth equities (Russell 1000 Growth), U.S. large cap value equities (Russell 1000 Value), U.S. midcap equities (Russell MidCap), U.S. midcap growth equities (Russell MidCap Growth), U.S. midcap value equities (Russell MidCap Value), U.S. small cap equities (Russell 2000), U.S. small cap growth equities (Russell 2000 Growth), U.S. small cap value equities (Russell 2000 Value), international developed ex.U.S. equities (S&P Developed Ex-U.S. BMI), emerging market equities (MSCI Emerging Markets), REITS (FTSE Nareit All REITs), U.S. core plus fixed income (Bloomberg Barclays U.S. Universal), global fixed income (FTSE Non-USD WorldBIG), treasuries (Barclays U.S. Treasury 7-10 Year), and cash (FTSE 3-Month Treasury Bill). The asset allocations will be reviewed and rebalanced on an annual basis after calendar year end. Black-Litterman inputs: Risk Free Rate: 1.52%, Risk Premium 4.76%. Note: In certain instances we have applied minimum and/or maximum constraints to limit the percentage of allocations into specific asset classes

Investment Manager Selection (Pages 8 – 15) After creating the asset allocations using asset classes, we will use Separately Managed Accounts (SMA) to create the Top Gun Model Portfolios. Rather than using mutual funds, ETFs, or stocks, we will use SMAs from the PSN SMA database. To remove all biases, we select the investment managers by using the PSN Top Gun winners. We look back over the past three years to locate managers who have been selected as Top Gun managers most often. If this results in multiple managers in one asset class with the same number of Top gun awards, we will use the manager that exhibits the lowest correlation to the managers in the other asset classes. Finally, to make the portfolios similar to publicly traded model portfolios, the manager selection process and due diligence will occur annually, after the release of the fourth quarter PSN Top Guns. However, we reserve the right to replace a manager during the year if there is a change in structure, portfolio manager, or other fundamental changes within the strategy. Within the Top Gun categories, we use the 5 Star classification, if there is no 5 Star classification for a particular asset class, we use the 3 Star classification. The SMA returns used in the analysis are gross returns.

Benchmark - The Benchmark used in the analysis is 60% MSCI ACWI Index + 40% Barclays Global Aggregate Index. The index is rebalanced annually.

Note - The Top Gun and ETF Model Portfolios will be rebalanced to their original weights annually.
